WORK EXPERIENCE

INFOR PSSC

Software Engineer

Taguig City

2025 – 2026

- Implemented Spec-Driven Development utilizing AI tools, achieving 100% sprint completion with zero carryover spillovers and improved development velocity
- Increasing unit test coverage from 20% to 85% by clearing a long-standing technical debt backlog and establishing rigorous testing standards.
- Introduced Enhanced application performance improvement by implementing Redis as a distributed caching layer, reducing database load and improving response times for high-traffic endpoints.
- Led a migration of the backend service from javax to Jakarta EE, ensuring compatibility with modern Java runtimes and future-proofing the core service architecture.

MANULIFE IT DELIVERY CENTER ASIA

Fullstack Engineer

Makati City

2020 – 2025

- Led a country market team to deliver end-to-end feature enhancements using Angular for the frontend and Java Spring Boot for the backend.
- Successfully deployed countless features to production environments. Coordinated with QA and DevOps teams to streamline release cycles, implement rollback strategies, and monitor post-deployment metrics for continuous improvement.
- Authored reusable and configurable universal-form library with form builder application using Angular designed to support dynamic form rendering across multi-country projects with varying business rules and localization requirements.
- Conducted technical interviews and led onboarding efforts for associate developers, fostering a collaborative and growth-oriented team culture.

UST GLOBAL

Junior Fullstack Engineer

Taguig City

Feb 2018 – May 2020

- Handled application deployments to production environments using Team Foundation Server (TFS) (now known as Azure DevOps) and Internet Information Services (IIS).
- Developed and maintained web and desktop applications across multiple projects using technologies such as Java Spring Boot, AngularJS, Angular, JSP, C#, and Java Swing. Delivered scalable and user-friendly solutions tailored to business requirements, contributing to improved system performance and user satisfaction across platforms
- Developed and optimized stored procedures and complex SQL queries for MySQL and Oracle databases, seamlessly integrating them with web applications

CONVERGYS

Technical Service Representative

Quezon City

Jul 2016 – 2018

- Assisted over 2000 customers through phone while maintaining >90% customer satisfaction and resolution rate in the scorecard.

PROJECTS

DENR BOOKING SYSTEM

2024

- Architected a ground-up mountaineering booking ecosystem for environmental resource management. Implemented complex scheduling logic and secure payment integrations to handle high-volume seasonal traffic

U-TRADE PLATFORM

2023

- Deployed and maintained a scalable web application using AWS LightSail, optimizing cost and performance for a small-to-medium investment platform

EDUCATION

STI COLLEGE FAIRVIEW

Bachelor of Science in Computer Engineering

Quezon City

Jun 2011 - May 2016

Academic Awardee
